Portfolio Objective

THB Mid Cap seeks long term capital appreciation over full market cycles by investing in a concentrated group of companies within the Russell Midcap Index that THB believes are undervalued, display lower volatility, and have superior operating metrics. The strategy will hold exactly 30 securities and have high active share.

Our Firm

Market Commentary

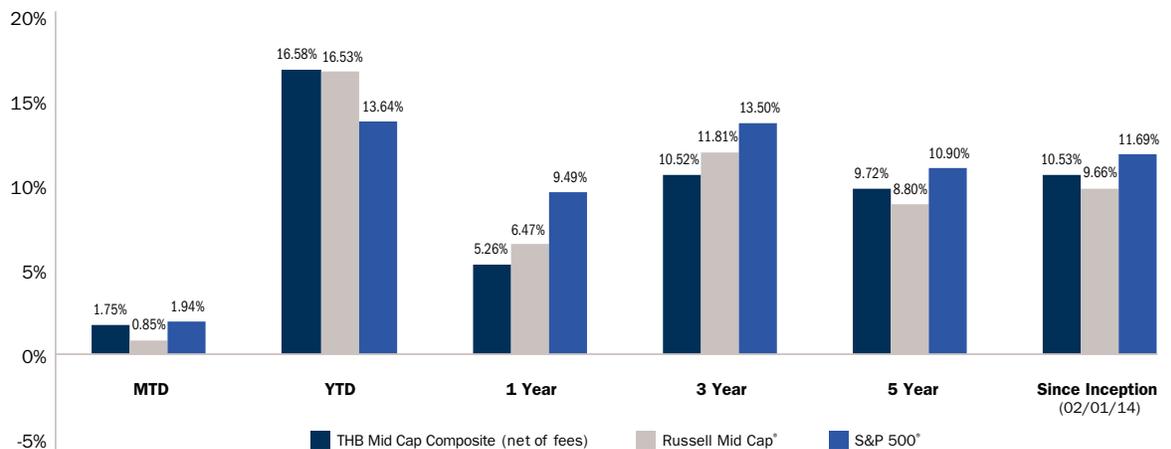

The Russell Midcap® Index (Index) returned +16.5% (USD) in 1Q with all sectors exhibiting positive returns.

Information Technology (+23.9%) was the best performing sector, followed by Energy (+20.7%) and Health Care (+17.4%). Communication Services (+8.3%) was the worst performing sector, followed by Consumer Staples (+9.2%) and Utilities (+11.7%).

The U.S. equity markets rebounded nicely during 1Q following a tumultuous end to 2018. Many of the concerns that contributed to the broad selloff late last year were replaced with optimism regarding a potential U.S./China trade resolution, solid corporate earnings, and a more dovish stance from the Federal Reserve that left interest rates unchanged and scaled back projections for further rate hikes in 2019. The U.S. federal government shutdown earlier in the year had some effect on consumer and business confidence indicators, but recent measures are off the intra-quarter lows and we believe we will continue to see higher levels of confidence as we move further away from the shutdown.

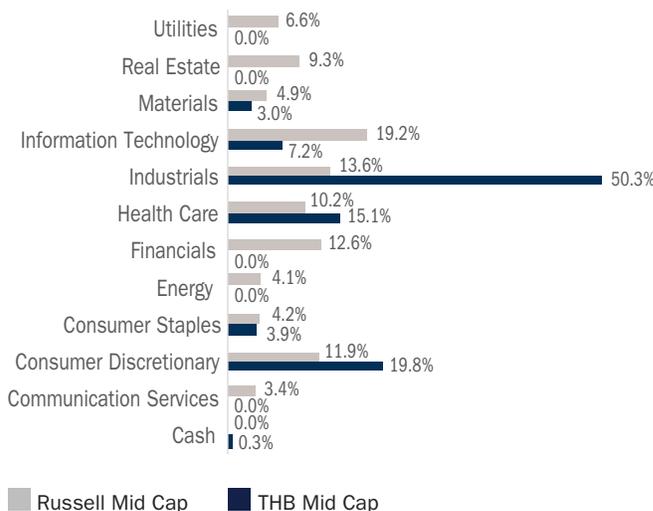

Employment is strong and will continue to drive the economy. The next leg of economic expansion will be supported by capital spending on technology to enhance automation, improve efficiency, and combat wage pressure as businesses find it more difficult to squeeze margins out of the labor force. Increased capex triggered by tax reform and deregulation efforts takes time to flow through the economy and we may be in the early days of witnessing the related economic growth benefits of these initiatives.
